

Enhancements

to your natural gas system in Elgin, Pingree Grove, Hampshire - Kane County

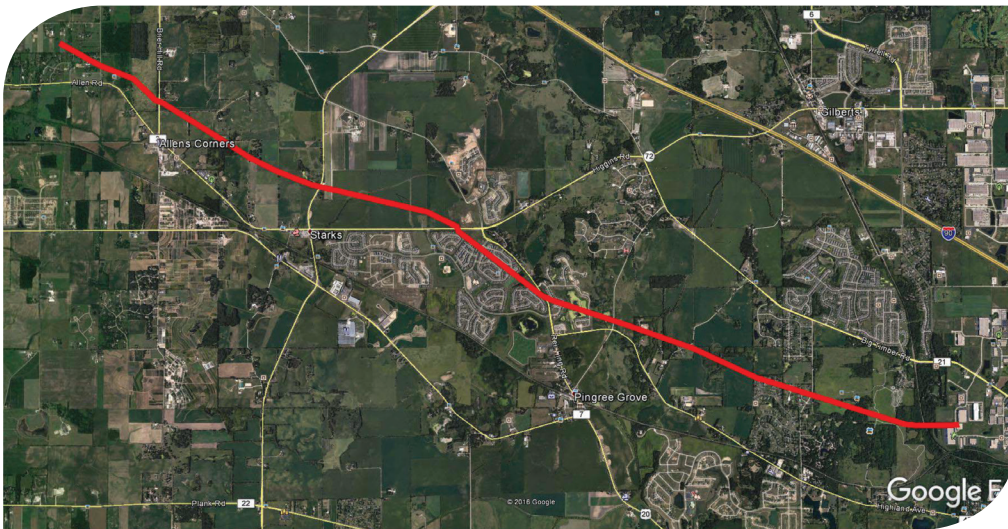

Delivering your natural gas is a responsibility we take very seriously. As part of our commitment to construct, operate, maintain and inspect our natural gas system to ensure safe and reliable service to our more than 2.2 million customers, we are making enhancements to portions of our natural gas transmission system.

Replace Natural Gas Pipeline

Beginning in June 2017, Nicor Gas will be replacing an 8 mile segment of natural gas transmission pipeline, as outlined in the map below.

Preliminary work, including soil sampling and right-of-way clearing will begin in March/April 2017. Construction is anticipated to conclude by November 2017. Nicor Gas customers will continue to receive natural gas service during the construction period and this project will not cause service interruptions.

At the completion of the project, Nicor Gas will restore areas impacted by our construction.

Areas Affected

This project will be done completely within the existing Nicor Gas right-of-way and easement corridor beginning west of Randall Road (Madeline Road) to Ketchum Road.

Our Commitment

We take great care in implementing construction practices that limit disturbances and we understand your time is valuable. We appreciate your understanding and thank you for allowing us to continue to provide you with safe and reliable natural gas service.
